

QUESTIONS TO CONSIDER

Get Inspired

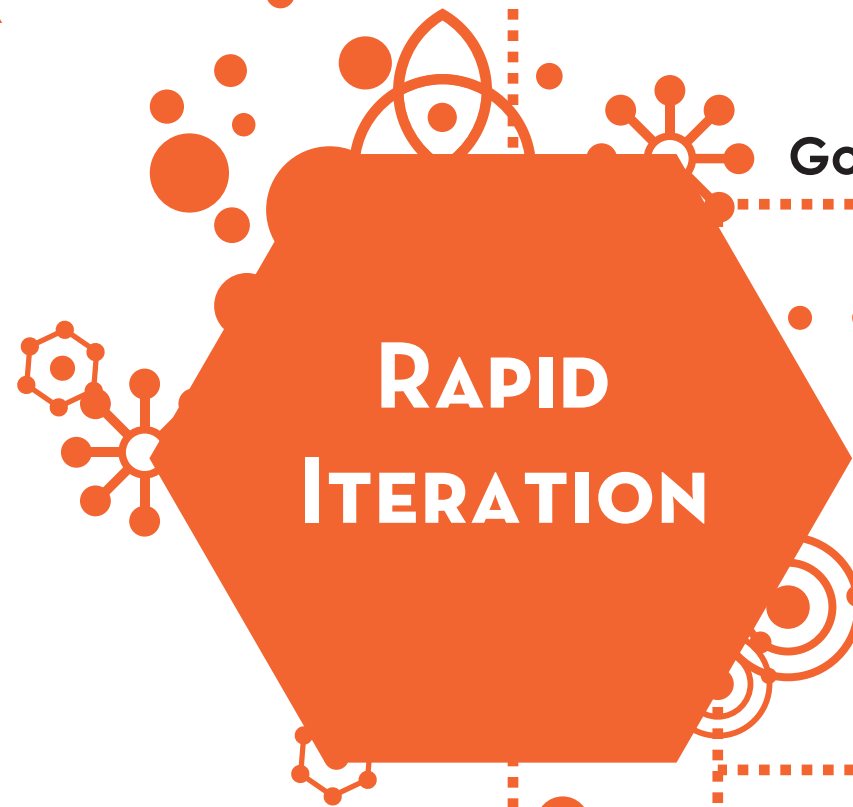

What are compelling issues in your environment that could be seeds for prototyping challenges?
What content areas or concepts might these challenges match well with?
Who else in your community might be excited to participate? How?

Get Prepared

How will you prep learners on what prototyping and iteration mean?
What might be hard for them to do or get?
How will you get materials?
How will you set the stage for prototyping?
Will you do testing, or will the prototype itself be the end product?
How will people share their findings?
How will you evaluate product? Process?

Brainstorm with your content area group on a whiteboard, then use the Next Steps grid to plan.
